

GORE® TENARA® THREAD

Care and Maintenance Guide

Gore® Tenara® offers the highest UV resistance of any thread in the world and is ideal for outdoor applications. It is made from a unique polymer that resists chemicals, saltwater, extreme weather, and acid rain. We recommend the below cleaning procedure for maintaining your product thread.

PRE-RINSE

Rinse off with cool water to loosen surface dirt and contaminants.

WASH

Wash with a cleaning solution of mild detergent and water. For stubborn dirt or debris build up, a soft bristle brush may be used.

NO BLEACH

The use of bleach is not recommended and may shorten the life of the thread.

RINSE

Rinse thoroughly with water and allow to air dry.
